What Is Zolpidem?

Zolpidem is a prescription medication commonly used for the **short-term treatment of insomnia and sleep-related difficulties**. It belongs to a group of medications called **sedative-hypnotics**, which work by affecting certain neurotransmitters in the brain that regulate sleep.

Healthcare providers may prescribe Zolpidem for:

- Difficulty falling asleep
- Short-term insomnia treatment
- Temporary sleep disturbances
- Sleep regulation support during stressful periods

Zolpidem should only be used under the supervision of a licensed healthcare professional to ensure safe and effective treatment.
