What Is Xanax?

Xanax is the brand name for **alprazolam**, a prescription medication that belongs to the **benzodiazepine** class. It works by enhancing the activity of certain neurotransmitters in the brain, helping calm the nervous system and reduce excessive anxiety or panic responses.

Healthcare providers may prescribe Xanax for:

- Anxiety disorders
- Panic disorders
- Short-term management of severe stress symptoms
- Certain anxiety-related conditions

Because Xanax affects the central nervous system, it should only be used under the supervision of a licensed healthcare professional.
